

Arad Pilevar Javid

Computer Engineering Student | Passionate about AI, Backend Development & Algorithms | Python, Rust, Cpp

Rasht, Gilan Province, Iran

Summary

I am a Computer Engineering student at the University of Guilan, deeply driven by the potential of Artificial Intelligence and resilient and reliable backend systems. My hands-on projects—including AI-driven game agents (Minimax/MCTS), encrypted password managers, and

Rust-based CLI projects—reflect a dedication to solving complex problems with clean, efficient and reliable code and making practical tools.

Experience

Gilak Daneh Navid

Web Developer

July 2026 - Present

StudyBuild

Data analysis

July 2026 - Present

Education

University of Guilan

Bachelor's degree, Computer Engineering · (October 2025 - 2029)

National Organization for Development of Exceptional Talents
(Sampad)

· (2019 - 2025)

Top Skills

Linux

Artificial Intelligence (AI)

python

Languages

Persian (Native or

Bilingual) German

(Elementary) English (Full

Professional)

Projects & tools used in them

ccp_tree: Rust, CLI

course_predator: Networking, TCP, GUI, python, pygame

vault pass: Encryption, GUI, python, pygame

snap_food: python, git, SQL

my portfolio website: web development, JS, front-end dev

snake-game: python, pygame, AI player

Certifications

Python developer

دوره آموزش درک برنامه نویسی

Coding for Data

Advanced Python Programming
And Object-Oriented Thinking
Course

C++ Certificate
